SUMMARY

4th-year Computer Engineering student at Ege University with a strong foundation in **full-stack web development** and financial technologies. Experienced in building dynamic user interfaces and scalable systems utilizing **React.js** and **Node.js**, backed by a solid understanding of the fintech ecosystem. Proficient in JavaScript, C#, and SQL with strong problem-solving skills, eager to bring energy and technical competence to Softtech's applications development team.

EXPERIENCES

Software Persona (TNC Group)

01/2026 – 02/2026

Software Engineering Intern

- **Developed full-stack web applications using React.js and Node.js**, implementing dynamic user interfaces, state management, and secure RESTful APIs.
- Programmed a cross-platform e-commerce mobile prototype with **Flutter and Dart**, accelerating the UI workflow by **20%**.
- Structured relational database schemas using **SQL and T-SQL**, optimizing query execution speeds for efficient data management.
- Designed interactive prototypes and user-centric interfaces following UI/UX best practices via **Figma**.
- **Reference:** Zekiye İrem Akıcı (General Coordinator) - iremakici@tncgroup.info

QNB Finansbank

02/2026 – 03/2026

Digital Banking & Finance Intern (QNB 101 Program)

- **Analyzed** banking industry fundamentals and corporate operational structures across **3+** financial business families.
- **Engaged** in specialized fintech workshops, completing **40+** hours of digital transformation and career pathing training.

PROJECTS

Let'sMeet – Co-Location Event & Social Networking SPA

React 19, JavaScript, Firebase v12 (Firestore, Cloud Functions), Context API

- **Engineered a real-time social networking SPA** featuring dynamic event matching, interactive mapping, and a location picker via **Google Maps JS SDK**.
- **Architected a NoSQL schema** using Firestore Subcollections to efficiently manage user-follow relations, atomicity, and pending requests.
- **Implemented global state hydration** with React Context API, syncing authenticated user profiles and active event streams directly with real-time database hooks.

CRUD Event Management Application

React 19, TypeScript, Vite, Tailwind CSS

- **Engineered a type-safe single-page application (SPA)** utilizing Vite for optimized Hot Module Replacement (HMR) and fast build performance.
- **Implemented full CRUD functionality** to dynamically manage community events with real-time UI state synchronization.
- **Designed a responsive UI with Tailwind CSS**, integrating strict form validation and optimized client-side search/filter mechanisms.

SenseFin: AI-Native Cognitive Fraud Prevention Engine

C#, .NET 9, EF Core, Redis, Google Gemini

- Developed an AI-native transaction fraud detection system using Clean Architecture and Domain-Driven Design (DDD).
- Integrated a Redis Lua scripting velocity layer for high-speed filtering and a custom JSON parser for robust LLM parsing.

EDUCATION

Ege University

Computer Engineering

4th Year Student GPA: 3.27 / 4.00

2022 – Present

İzmir

TECHNICAL SKILLS

Programming Languages

C#, Java, Python, JavaScript, Dart, SQL.

Web & Mobile

React.js, Node.js, Flutter, ASP.NET Core, HTML/CSS.

Databases

PostgreSQL, MsSQL, MySQL, Entity Framework Core, Firebase, Redis.

Tools & Concepts

Git, GitHub, Figma (UI/UX), DDD, OOP, Data Structures.

ADDITIONAL INFORMATION

Languages

Turkish (Native), English (Upper Intermediate – B2)

Activities / Hobbies

IEEE Student Branch Member, LÖSEV Volunteer. Interests: Football, swimming.

Certifications

Miuul – AI Coding Camp (2025)
Udemy – Python with OpenCV (From Scratch to Expert)
BTK Academy – Introduction to AI & Algorithms
